

Box clever

- Double-walled polyethylene construction
- Polyethylene insulation – added strength
- Tough – robust – long-lasting
- Corrosive resistant – fully recyclable
- Large capacity – easy to stack and handle
- Hygienic – EU/FDA-approved materials

1000L MPC container

As industry demands for improved hygiene, flexibility and ease of handling have increased, the bulky wooden and metal containers of the past have found themselves replaced by an array of sleek, high-grade plastic tubs, each with its own special qualities and design.

One of the latest entrants to this on-going revolution comes in the form of the Sæplast 1000L, a 1,000-litre rotational-moulded insulated polyethylene container designed specifically for use with corrosive products, such as saltfish.

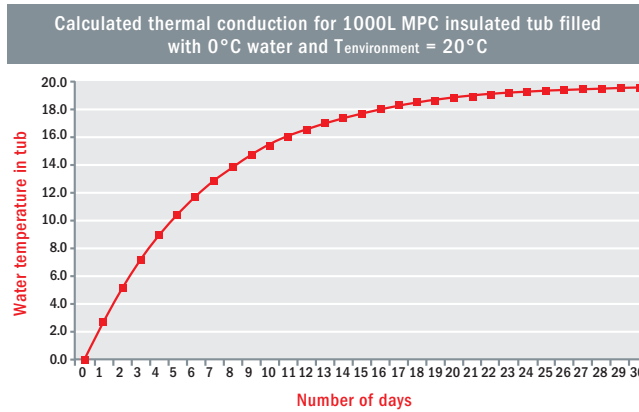

Constructed from a tough recyclable polyethylene shell with an expanded polyethylene core for added strength, the double-walled, heavy-duty 1000L MPC weighs in at a lightweight 91 kg, and is ergonomically designed for optimum hygiene and ease of handling.

Constructed from EU and FDA-approved food-grade materials, it comes with handles on all corners, a new design of fork-lift entries for easy fork or jack lift, and can be stacked in units of four when full, or six when empty.

The Sæplast 1000L MPC container is significantly less prone to cracking than conventional tubs, and easily welded if damage does occur.

MPC 1000L

The Sæplast 1000L MPC is available with an optional lid.

Stack and hoist capabilities of tubs	MPC tubs
Max number of loaded tubs in a stack	4 units
Max weight on four handles during hoist	1600 kg

Options include a matching lid, drain-hole plugs, customised marking and tub colour, as well as embedded Radio Frequency Identification (RFID) tags to meet ever-increasing demands for product traceability and real-time tracking.

Type	Description (all dimensions in cm)	Outside dimensions			Height	Inside dimensions			Weight	Volume
		L	W	H	with lid	L	W	H	Kg	Litres
051000	1000L with MPC insulation	147	118	89	96	139-135	110-106	72-71	91	1020

Sæplast products are constructed from EU/FDA-approved food-grade materials. Dimensions and weights are +/-2%.
