

Off the bone

- Double-walled polyethylene construction
- Polyethylene insulation - high impact resistance
- Tough - robust - long lasting
- Corrosive resistant - fully recyclable
- Easy to stack and handle
- Optimum hygiene - EU/BGA/FDA-approved materials

600L MPC container

As industry demands for improved hygiene and ease of handling have increased, the bulky wooden and metal containers of the past have found themselves replaced by an array of sleek, high-grade plastic tubs, each with its own special qualities and design.

Specifically designed for use in the food industry, the Sæplast 600L MPC is a 603-litre, rotation-moulded insulated container featuring ergonomically designed raised grips on each corner for easy stacking and handling.

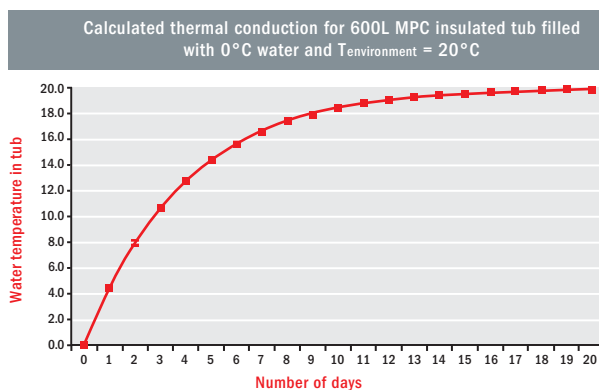

MPC 600L

Constructed from a superior new polyethylene resin, the double-walled Sæplast 600L is crafted from a tough, recyclable polyethylene shell with an expanded polyethylene core for added strength and high impact resistance.

Weighing in at a lightweight 50 kg, the 600L is easily accessible by hand jack from all sides, and comes fitted with ISO 6780 fork-lift entries and legs, and handles on its short sides for easy lifting and stacking.

Manufactured from EU, BGA and FDA food-grade polyethylene, the 600L also features smooth, seamless contours to ensure optimum hygiene and easy washdown.

Significantly less prone to cracking than conventional tubs and easily welded if damage does occur, the Sæplast 600L MPC tub can be ordered in a range of customised colours and owner livery.

The Sæplast 600L is specially designed to inter-stack with Dolav box-pal type 1000 containers.

Stack capabilities of tubs	
Fully loaded	4 units
Empty	8 units

Options include customised marking and tub colour, as well as embedded Radio Frequency Identification (RFID) tags to meet ever-increasing demands for product traceability and real-time tracking.
