

Lift, jack and stack

- Durable polyethylene construction
- Frost-resistant - hard-wearing
- Easy to handle - easy to stack
- Flat-top and raised-lip versions

Pallets

Crafted from durable, hard-wearing polyethylene, Sæplast pallets are the ideal solution for withstanding the harsh conditions, rough handling, extremes of temperature and frequent washdown sessions which characterise life in food processing plants and warehouses.

Flexible in design, long-lasting, frost-resistant and easy to clean, Sæplast pallets come in a variety of standard sizes, and are the logical, economic replacement for out-dated wooden or more brittle injection-moulded models.

Ideal for storage and transportation and easily handled by pallet jack or forklift, Sæplast pallets come in a variety of sizes. Available in flat top or raised-lip versions, they include as standard a range of features, such as an imprinted serial number for ready product identification and traceability, and are light and easy to stack.
